Here's those 4, including the DIBP animal paper. If you want more, I think Xabier's could go (it's about ready for technical review), but I don't have it, and last week Andre was close to having a draft ready to share with co-authors on the DEP paper.

There are two submitted, and one in STICS. Do you want that one too? I also have one that's ready for tech edit if you want more.

Can we please get the submitted versions of the manuscripts for sharing with GAO (they are doing an audit). We told them that we are "off ramping" them as IRIS assessments but wanted to show GAO that we actually finished the assessments (at least journal versions for submissions).

Thanks!

Hi - can you send them to me? They should have a draft water mark.
